Possible Duplicate:

[Where cookies are stored in system?](#)

Hi,

Where are the 'Cookies' stored on our machine ?

1. If I use Mozilla
2. If I use IE
3. Other browsers..

[cookies](#)

I created a web application in VS 2008 and wrote a code like :- Response.Cookies["user"].Value = "rauf"; and ran the code using debug option of VS2008. Then I searched the paths specified above and did not find the cookie, Please help me. – Rauf Apr 18 '11 at 9:30

2 Incorrect. Firefox 3.6.15 stores cookies in an sqlite database, and you have to use a third party tool to extract cookies.txt. Chrome uses some binary format (possibly sqlite). These paths are also only valid on Windows XP and take no account for Windows Vista/7. – mdm Apr 18 '11 at 9:36

1 you need to use cookie editor – Nirmal- thInk beYond Apr 18 '11 at 9:38

Yeas. I got it. Go to Windows->Start->Run "C:\Documents and Settings\rauf\Cookies" – Rauf Apr 18 '11 at 10:10

There is no generic location, it depends entirely on the browser, and in some cases the version as well (some versions of Firefox stored them in a file called cookies.txt, now I think it is in an sqlite database).

Google is your friend!
